Washington, DC 20554

Dear The Federal Communications Commission,

If a increase is needed to fund the rural locations, then and increase is necessary.
part of the wagon wheel is in the muck, part is in the sky, part is rolling in to the other. paint your wagon whatever color you dream. in classical periods what colors were wagons painted. and who commissioned the painting. those who painted the wagons were selected to pursue a lively hood in painting, making paints from natural resource, and then transporting them as I understand on the back of mules from work site to work site. so a painter was more or less a wizard of principals interests. maybe the king or queen pet. ah what would it feel like to be painted Happy.

Sincerely,

steven ball
